

Man, can you imagine what else the U.S. Government knows about swimming around down there in that water?

This crocodile was killed in New Orleans several days after the Katrina Hurricane passed through. The croc apparently entered the flooded areas of the city where levees broke. This killer croc was seen by hundreds of flood victims and rescuers swimming down the flooded streets. One of the witnesses actually saw the croc as it passed by some white rescuers in order to capture an elderly black man that was attempting to exit his flooded home. Other witnesses in the following days reported that the killer croc captured and swallowed three other blacks that were trying to swim to safety. The crocodile was eventually snagged by some looters who used stolen fishing equipment to subdue the croc and stolen guns to eventually kill the crocodile. One of the crocodile's near victims, 84 year old Esther Johnson, credited the looters with her rescue from the crocodile. "Thank heaven those looters were here to save me!" The beast which measured 21 FT long, weighed 4,500 lbs was estimated by a local marine biologist to be of African origin.

Specialists from SeaWorld who examined the crocodile said that the croc is most likely one of the US Navy's specially trained counter terrorism crocodiles. The crocodiles, approved by the Bush administration under the direction of Defense Secretary Donald Rumsfeld, were trained to capture and kill terrorist divers feared to be lurking in the water in major seaports from New York to Houston. Commander Dwight Spears, U.S. Navy ret. confirmed that the crocodiles had been trained since birth to feed only on dark skinned humans, a term he referred to as "profiling."
